- Clinical tips to guide the clinician in day to day practice.
- Questions and answers to discuss the uniqueness of the case.
- Further reading and references for extensive literature search.
- Author's viewpoints are included.

Glimpse from the Book

CASE 248
Space Regaining using Jackscrew Appliance

TREATMENT PLAN: The patient had a mild case of anterior crossbite, which led to the malocclusion of posterior teeth and open bite. Hence, space was regained using jackscrew appliance incorporating permanent retainers.

Figure 1: Orthodontic appliance
 Figure 2: Radiograph showing space regaining
 Figure 3: Radiograph showing retention of space
 Figure 4: Radiograph showing retention of space
